

For the Diary

The year is racing by...

With the beautiful autumn weather and lack of rain it's made for ideal installation conditions. InnoFlow NZ had a busy April with around 15 residential installations of AdvanTex® AX15's and AX20's.

NZ Installer Conference

The confirmed dates for the conference are Thursday 24th & Friday 25th May. The venue is in Albany, North of Auckland. If you have not received any information please let us know ASAP as we would like to confirm numbers for attendance chriss@innoflow.co.nz or mobile 021 877 089

An Interesting Case Study

Spaceport America, if it's good enough for Richard Branson...

AdvanTex® was chosen to provide wastewater treatment to service the vertical launch pad, terminal/hangar facility and the maintenance building at the world's first commercial spaceport. Space tourists will travel to the edge of space aboard a variety of commercial spacecraft.

For more information, download the full case study from the home page of our website.

Meet the Team

The Warehouse Crew

Trevor Miller takes care of all the orders dispatched from our warehouse in Dairy Flat, Auckland. Trevor and his trusty assistant John Jones assemble each of the AdvanTex® treatment systems that leave our Auckland premises. Trevor has been part of the InnoFlow team for six years and knows the AdvanTex® product inside out! Trevor and John are both from the UK, are avid football fans, and will always have a good fishing tale for you!

Interested in Installing AdvanTex®?

We're always looking for great people to install and service our systems, as well as provide a local contact for the large number of enquiries we receive. We offer full support including training to achieve authorised installer status. The AdvanTex® system is ideal for a wide range of applications including holiday homes, environmentally sensitive areas, or simply the home owner who wants the best system on the market!

For more information please email:

Phone 0800 466 635 in New Zealand
or 1800 466 635 in Australia

AdvanTex® Treatment Systems

AX- Greywater

AdvanTex® textile filters are used worldwide for sites requiring or choosing to recycle greywater. Australasian sites include elderly care facilities in Victoria and Tasmania, and a large commercial building in the Australian Capital Territory, all reusing greywater for irrigation.

Re –Use Applications

- Toilet flushing
- Wetlands, ponds, lakes
- Fire suppression
- Dust control

Warracknabeal Health Care Centre
AdvanTex® Textile Filters offer a reliable, affordable, scalable, and energy-efficient solution for treating both greywater and blackwater.

All AdvanTex® Units...

- use physical filtration and natural, biological processes to reduce bacteria
- are highly energy efficient, using less than 2kWh per 4000 litres
- can be monitored and controlled by remote telemetry
- are modular and can be installed in multi unit arrays
- are easy to operate and maintain
- are made in the USA

Innoflow Australia

Fraser Island

Innoflow Australia has had a very positive start to 2012. With the installation success of the AdvanTex® AX200 into the Central Station Campground on Fraser Island QLD, a second AdvanTex® treatment system will be installed on the island. This plant will service the Waddy Point Campground. The system is modular, made from two AdvanTex® AX100 treatment pods, allowing for expansion if and when it's required. The equipment is in transit and will be installed in June by Alliance Water Solutions.

Central Station Campground, Fraser Island, QLD

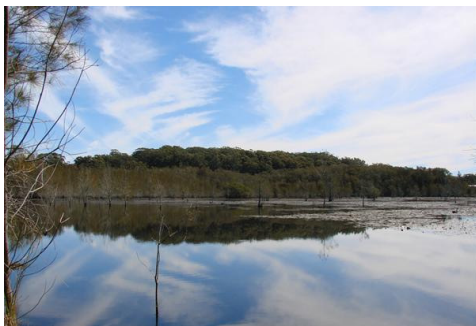

Mount Tamborine

Another June installation into the Queensland area is an AdvanTex® AX100 treatment system, which will service the very first supermarket in Mount Tamborine.

Solar Powered AX20

Greater Taree City Council has engaged Innoflow to install an AX20 for a new toilet block at the Cattai wetlands, Mid Coast NSW. The site was formally farmland which has been transformed back to wetlands and now attracts a wide range of bird species. The AdvanTex® system will entail one AX20 treatment pod, and be solar powered.

Cattai Wetlands, Mid North Coast,

Tender Wins

Otakou Marae, Dunedin, NZ

Primary Treatment

- 22,500L Septic Tank
- 3 x 22,500L Buffer Tanks

Secondary Treatment

- 1 x AX100 Pod
- 13,000L Recirculation Tank
- 13,000L Treated Effluent Tank

Disposal

- 2000sqm drip field

Design Flow

- 10,000L buffered per day

Lake Ohau Shearers Quarters, Canterbury, NZ

West of Twizel in the central South Island is Lake Ohau station. The station requires an AX40 plus an additional two large buffer tanks which will service the shearers' quarters. Drainage Worx will be travelling from Auckland to complete the install late in May.

The Biotube® EasyPak™ Pump Package

The kit saves time for the installer, and saves the disposal field from clogging. Choose the option of demand, or timed dosing.

The kit includes (left to right), splice box, control panel, EasyPak™ pump vault and Biotube® filter cartridges (3), flow inducer, float switches, discharge plumbing assembly and the turbine effluent pump
